Subject: latest UCMR PFC list

Jane –

Here is the spreadsheet with the latest PFCs info from the UCMR3 sampling for New England. The most recent data release contains more than 99% of the data expected from all the participating PWSs, so it is essentially complete at this point.

There were no new detections of PFCs in the Region in the new dataset, but the new Health Advisories mean that there are more red numbers in the list for individual and combined exceedances of the Health Advisories.
